Summary

Computer Science student specializing in Artificial Intelligence and Machine Learning with experience building full-stack and machine learning applications. Skilled in Python, C++, React, FastAPI, SQL, and REST APIs, with hands-on experience integrating LLM APIs and deploying applications to cloud platforms. Strong foundation in Data Structures & Algorithms, problem solving, and software development..

Skills

Programming: C++, Python, JavaScript

Frontend: React.js, HTML, CSS

Backend: FastAPI, Node.js, REST APIs

AI/ML: Scikit-learn, NLP, Pandas, NumPy, Groq API

Databases: MongoDB, MySQL, SQL

Tools & Platforms: Git, GitHub, Render, Streamlit, Figma

Core Concepts: Data Structures & Algorithms, OOP, Problem Solving, Responsive Design

Experience

UI/UX Intern

Feb 2026 – Mar 2026

NoCapCode

Remote

- Designed user-friendly interfaces and improved user experience for web applications using Figma.
- Created wireframes, prototypes, and high-fidelity designs following modern UI/UX principles.
- Collaborated on design improvements focusing on usability, accessibility, and visual consistency.
- Enhanced design thinking skills by working on real-world product requirements.

Projects

QueryMind – AI-Powered Database Assistant | *React, FastAPI, MySQL, Groq, Render, Aiven*

Aug 2026

- Built and deployed a full-stack AI assistant that enables natural-language querying of MySQL databases without manually writing SQL.
- Implemented ambiguity detection and clarification workflows, and integrated Groq API to generate queries and natural-language answers from database results.
- Deployed React frontend and FastAPI backend on Render with Aiven-managed MySQL and environment-based secure database configuration.

Mental Health Score Prediction System | *FastAPI, Scikit-learn, Pandas, HTML, CSS, JavaScript, Render*

Jul 2026

- Built an end-to-end machine learning web application to predict mental health scores using social media usage, lifestyle, and demographic features.
- Developed a FastAPI backend with Pydantic-based input validation and integrated a Scikit-learn regression model for real-time predictions.
- Managed the complete development workflow using Git and GitHub.

AI-Based Farmer Query Support System (SIH) | *React, HTML, CSS, JavaScript, Figma*

Sep 2025

- Built a responsive frontend system for an AI-powered agricultural advisory platform designed for rural accessibility and multilingual support.
- Built responsive UI screens for multilingual text, voice, and image-based crop query submission.
- Created user-friendly interfaces focused on accessibility for rural users and mobile devices.

Education

B.Tech – Computer Science & Engineering (AIML)

Sep 2023 – May 2027

Ajay Kumar Garg Engineering College, Ghaziabad

CGPA: 8.7 / 10
